Marine Science undergraduate with a strong focus on coastal ecosystems, carbon storage, and environmental assessment. Experienced in mangrove carbon stock research, field coordination for marine expeditions, and laboratory-based environmental analysis. Skilled in carbon quantification methods, sediment sampling, ecological data processing, and environmental reporting. Demonstrates leadership experience in research teams and organizational development, with a solid interest in blue economy, climate adaptation, and sustainable coastal management.

Work Experiences

Dinas Kelautan Perikanan dan Ketahanan Pangan Kabupaten Pangandaran - Jl. Raya Cijulang No. 345, Cibenda, Parigi Aug 2024 - Nov 2024

Intership

- Conducted technical assessments on Fish Landing Sites (TPI) operations and small-scale fisheries conditions in Batu Karas, including socio-economic and coastal vulnerability aspects. Measured coastal abrasion rates using shoreline monitoring methods and contributed to Marine Protected Area (MPA) mapping through GIS-based spatial analysis and zoning support for sustainable coastal management.

Dinas Lingkungan Hidup dan Kebersihan Kabupaten Pangandaran - Jalan Raya Cijulang Tlp/Fax (0265) 2641231 Aug 2024 - Nov 2024
Cibenda-Parigi Kode Pos 46393

Intership

- Conducted solid waste sampling and characterization following standard waste classification protocols, including organic, inorganic, and recyclable fractions. Assisted in waste generation data collection and basic quantitative analysis to support local waste management planning.
- Contributed to the design and development of an eco-friendly waste bin prototype aimed at reducing open burning and improving community-based waste handling practices. Demonstrated strong competencies in project management, environmental literacy, critical thinking, communication, and applied environmental technology during the internship program

Torgas Laboratory - Jatinangor, Jawa Barat Mar 2024 - Present

Head of Department

Pusat riset, pengembangan, dan inovasi yang berfokus pada pemanfaatan serta perlindungan sumber daya hayati laut sebagai penopang reformasi kelautan yang berkelanjutan

- At Torgas Laboratory, I lead and supervise research activities focused on carbon storage, particularly in coastal and marine ecosystems. My responsibilities include designing research frameworks, developing methodologies, overseeing laboratory and field data collection, and ensuring the quality and integrity of analytical results. I coordinate research teams, manage project timelines, and ensure that all research activities align with scientific standards and institutional objectives. I am also responsible for interpreting carbon stock data and contributing to scientific reports, technical documents, and strategic research development within the laboratory.
- In addition, I served as Field Coordinator during the Java Sea Expedition for the research project titled "Microplastic Elements and Polymer Chemical Characterization in Coastal Waters, Mangroves, and Marine Snails in the Java Coastal Region." In this role, I managed field operations, supervised sampling procedures across multiple environmental matrices (water, sediment, mangrove ecosystems, and marine biota), ensured proper sample handling and preservation protocols, and coordinated logistics and team deployment. I also ensured that field methodologies complied with established scientific standards for microplastic analysis and polymer characterization.

Education Level

Universitas Padjadjaran - Jalan Raya Bandung-Sumedang KM 21, Desa Sayang, Kecamatan Jatinangor, Kabupaten Sumedang, Jawa Barat, 45363 Aug 2022 - Aug 2026 (Expected)

Bachelor, 3.54/4.00

- Participating in ISOI (Indonesian Oceanology Scholars Association) academic activities as a poster speaker held at Diponegoro University, strengthening professional insight, scientific discussion skills, and academic networks in the field of oceanography and marine science.
- As a presenter at the 20th Annual Scientific Meeting and Congress of the Indonesian Oceanologists Association 2024 "67 Years of the Djuanda Declaration: The Strategic Role of ISOI in the Development of Science and Technology and Marine Innovation for Sustainable Development of the Indonesian Archipelago for the Welfare of the Indonesian People" Bogor, December 12-13, 2024
- Laboratory Teaching Assistant Sedimentology Course - Assisted in lab sessions covering vertical and horizontal sediment sampling, sediment analysis, grain size distribution, sediment classification, and interpretation of riverbed deposition. Provided instruction on simple sediment distribution mapping using GIS software, data verification, technical guidance, and field lectures for undergraduate students.

Organisational Experience

Himpunan Mahasiswa Ilmu Kelautan Unpad - Jatinangor, Jawa Barat <i>Staff of the Academic and Professional Department</i>	Dec 2023 - Dec 2024
KMPK FTIP FPIK Unpad - Jatinangor, Jawa Barat <i>Head of the Fellowship Division</i>	Jan 2024 - Dec 2024
Designing concepts and creating regular worship schedules. Building connections with PMK in each faculty through joint worship services.	

KOMITMEN <i>Director of Organizational Development</i>	Aug 2024 - Aug 2025
- Responsible for designing and implementing KOMITMEN's growth strategy, as well as ensuring operational effectiveness and adaptation to change. - Field Coordinator TRAX (Technical Research Anda Expedition) XI Led field operations during TRAX XI, the organization's annual flagship program, coordinating logistics, team deployment, and on-site technical execution to ensure activities were conducted effectively and according to plan.
