I am a Marine Science student with a strong interest in research, particularly in the fields of coastal conservation and oceanography. My interest stems from my concern for coastal ecosystems, which are currently facing increasing environmental challenges. I am interested in learning how scientific approaches can be applied practically to preserve and manage marine resources sustainably. In addition, I am also interested in digital information systems and how technology can be utilized to support coastal environmental management and monitoring.

## Work Experiences

**TORGAS LABORATORY - West Java, Indonesia** Apr 2024 - Present

*Laboratory Assistant*

I work at Torgas Laboratory as a Laboratory Assistant. In this position, I am responsible for conducting research in the field of carbon stock estimation in mangrove ecosystems. In addition, I also carry out data collection activities in the field, including measuring vegetation parameters, taking samples, and documenting data to support analysis and research report preparation.

- Mangrove Carbon Storage: Conducted comparative research on carbon sequestration within artificial mangrove ecosystems
- Java Blue Odyssey 2026: Performed biomass and sediment field sampling across multiple coastal sites in East Java

**KONSERVASI INDONESIA - South Jakarta, Indonesia** Aug 2025 - Dec 2025

*Intern*

I am involved in oceanographic data processing and coastal ecosystem connectivity modeling. This activity includes analyzing and modeling the interactions and spatial relationships between mangrove, seagrass, and coral reef habitats, with the aim of understanding coastal ecosystem dynamics and supporting sustainable marine resource management.

- Preparation of scientific journals on coastal ecosystem connectivity, ocean heat content, ocean salinity content, and ocean oxygen content

## Education Level

**Universitas Padjadjaran** Aug 2022 - Aug 2026 (Expected)

*Bachelor of Marine Science, 3.70/4.00*

- Laboratory Teaching Assistant Sedimentology Course - Assisted in lab sessions covering vertical and horizontal sediment sampling, sediment analysis, grain size distribution, sediment classification, and interpretation of riverbed deposition. Provided instruction on simple sediment distribution mapping using GIS software, data verification, technical guidance, and field lectures for undergraduate students.

## Organisational Experience

**Himpunan Mahasiswa Ilmu Kelautan (HIMAICA) - West Java, Indonesia** Jan 2023 - Dec 2024

*Staff*

Join the Academic and Professional Department, which serves as a forum for realizing intellectual aspirations, fostering a sense of community, improving skills, and promoting camaraderie among marine science students.

- HI-CLASS Project Officer: introducing existing communities in HIMAICA to new students

**KOMITMEN - West java, Indonesia** Aug 2024 - Aug 2025

*Head of the Maritime Instrumentation and Technical Survey Bureau*

Focus on developing members' technical skills, operating marine instruments, and conducting technical surveys to support competence in the field of applied oceanography.

- IoT Training
- 3D Bathymetric Mapping Training
- Marine Instrumentation Training
